IT Assistant

Microsoft 365 | Windows Server | Active Directory | Network Infrastructure | End-User Support | Backup & Disaster Recovery | VPN | Endpoint Security | IT Asset Management

PROFESSIONAL SUMMARY

IT Assistant with experience in enterprise IT infrastructure, end-user support, and day-to-day systems administration. I have experience with Microsoft 365, Windows Server, Active Directory, network infrastructure, and backup and disaster recovery. I provide technical support to over 40 end users, support the administration of enterprise systems and contribute to infrastructure projects that keep the business operations running smoothly. I enjoy troubleshooting technical challenges, improving user experience, and continuously expanding my knowledge of enterprise infrastructure and cybersecurity.

TECHNICAL EXPERTISE

- **Microsoft 365 Administration:** Hands-on experience supporting Microsoft 365 administration, including user provisioning, licensing, mailbox configuration and access management.
- **Windows Server & Active Directory:** Experience supporting Windows Server environments and Active Directory administration, including user account management, group memberships, password policies, and domain joined devices.
- **Technical Support:** Provide technical support to end users, diagnosing and resolving hardware, software, Windows, and network issues to minimize downtime and maintain user productivity.
- **Network Infrastructure:** Experience supporting LAN/WLAN environments, VPN connectivity, Cisco networking equipment, with additional exposure to MikroTik and Fortinet firewall environments.
- **Backup & Disaster Recovery:** Support backup and disaster recovery operations using Veeam Backup & Replication including routine backup activities to help ensure business continuity.
- **Endpoint Security:** Support antivirus and endpoint protection, firewall configuration, and secure access controls to maintain a secure IT environment.
- **Hardware Deployment & Asset management:** Deploy and configure desktops, laptops, printers, and business applications while supporting IT asset inventory, procurement across the organization.

PROFESSIONAL EXPERIENCE

IT Assistant | June 2024 – Present

English Press Limited, Nairobi

Environment: Microsoft 365 • Windows Server • Active Directory • Windows 10/11 • macOS • Cisco • MikroTik • Fortinet • VPN • Veeam Backup & Replication • Synology • Symantec Endpoint Protection • Yeastar PBX

As part of the IT team, I provide end-user technical support and assist the IT Manager in maintaining the organization's IT infrastructure, enterprise systems, and network environment. My role ensures users have reliable access to technology, supports daily IT operations, and contributes to infrastructure projects.

- Provide technical support to 40+ end users, troubleshooting hardware, software, Windows, and network issues to minimize downtime and maintain business continuity.
- Install and configure desktop computers and printers, including Windows OS installation, Active Directory domain joining, Microsoft 365 configuration, installing drivers, and setting up business applications.
- Support the administration of 30+ Microsoft 365 accounts, including user provisioning, licensing, mailbox configuration, and access management.
- Support the management of 40+ Active Directory user accounts, including onboarding, password resets, access permissions, and group memberships.
- Assist with Windows Server administration, backup operations, and disaster recovery processes using Veeam Backup & Replication.
- Contribute to infrastructure projects, including a Cisco core switch upgrade, configuring a MikroTik router for a fiber point-to-point link to our Disaster Recovery site.
- Support the migration from legacy Cisco IP Phones to a Yeastar IP Phone system and dedicated Yeastar PBX, coordinating with an outsourced telephony provider.
- Assist in maintaining LAN/WLAN infrastructure, firewall configurations, endpoint security, antivirus solutions, and VPN connectivity to support secure business operations.
- Support IT asset procurement, inventory management, and vendor engagements across the organization.

ICT Intern | August 2023 – May 2024

Laikipia County Revenue Board, Nanyuki

Supported the ICT department in delivering technical support, maintaining ICT systems, and contributing to the implementation of the county revenue management system. Worked closely with staff to troubleshoot technical issues and improve technology adoption across the department.

- Provided technical support to 15+ staff members, diagnosing and resolving hardware, software, and network issues to ensure smooth day-to-day operations.
- Participated in testing of the county revenue management system before deployment, identifying issues and supporting a successful rollout.
- Installed software updates, security patches, and system upgrades across user workstations and departmental servers to improve security and system reliability.
- Assisted in delivering user training on the county revenue management system, improving technology adoption and reducing recurring support requests.
- Carried out preventive maintenance and troubleshooting of computer hardware, software, and network infrastructure to maintain reliable ICT services.
