

ICT Systems Administrator and Technical Support Specialist

IT Systems Administration | Network Infrastructure Management | Cybersecurity & Data Protection | Windows Server & Active Directory Management | Technical Troubleshooting & Diagnostics | Hardware & Software Installation & Optimization | Microsoft 365 Administration & Cloud Computing | Disaster Recovery & Backup Solutions | IP Telephony & VoIP Configuration | Firewall & Antivirus Management | IT Asset & Inventory Management | Database Management & Data Analysis | Excel & Spreadsheet Automation | IT Training & End-User Support.

PROFESSIONAL SUMMARY

ICT Support Specialist with expertise in Microsoft 365 administration, website maintenance, and technical troubleshooting. Skilled in updating and optimizing web content, managing domain-based emails, and implementing cost-effective communication solutions to enhance organizational efficiency. Adept at monitoring system performance, identifying improvement opportunities, and assisting in the integration of new technologies to streamline IT operations. Proficient in Active Directory management and network infrastructure support ensuring seamless collaboration and data security. Highly adaptable, excelling in teamwork and problem-solving to support ICT initiatives in dynamic environments.

Career Strengths

- **Analytical Thinking & Problem-Solving:** Skilled in diagnosing IT issues, identifying root causes, and implementing effective solutions to optimize performance and security.
- **Email Administration & Communication:** Experienced in creating, managing, and troubleshooting user email accounts under domain policies, supporting seamless internal communication.
- **Network Infrastructure & System Performance Monitoring:** Proficient in network management including routing, switching and troubleshooting, evaluating system performance, maintaining links, and identifying areas for improvement to optimize ICT functionality.
- **Software Systems Administration & Support:** Experienced in installing, configuring, updating and supporting software applications, ensuring security and minimizing downtime for users.
- **Hardware deployment & maintenance:** Proficient in managing desktops, laptops, network equipment and peripherals including diagnostics, upgrades and maintenance to ensure optimal performance.
- **Server management:** Skilled in managing physical and virtual servers, monitoring performance, updating and managing user access for reliable operations.
- **Backup & Disaster recovery:** Experienced in implementing and monitoring backup strategies and maintaining data integrity to protect against data loss and disruptions.
- **Website Maintenance & Optimization:** Skilled in monitoring, updating, and improving website content to ensure accessibility and engagement for stakeholders.
- **Adaptability & Flexibility:** Quick to adapt to emerging technologies, evolving IT trends, and evolving organizational needs while maintaining high performance under pressure.

IT Support Technician | June 2024 – Present **English Press Limited, Nairobi**

Part of a two-person ICT department, working directly under the IT Manager to provide end-to-end technical support, systems administration, and network infrastructure management for the organization.

Key Contributions

- Windows Server and backup management. Assisted in management of Windows Server environments, disaster recovery strategies, and VIM backup solutions, fortifying data security and business continuity.
- Domain management. Supported licensing management, monitoring and troubleshooting.
- Active Directory management. Assisted in user account control, access permissions, password policies and authentication management in the domain, including configuring password expiry policies and creating new user accounts for employees as they onboard.
- Hardware and software management. Diagnosed, upgraded, and optimized hardware and software systems, resolving technical issues, and significantly improving operational performance.
- IP phone management. Assisted in configuring and administered enterprise-level IP phone systems, including supporting the migration from legacy Cisco 7911 phones to Yeastar V60 IP phones and the transition from router-managed telephony to a dedicated Yeastar PABX, liaising with an outsourced telephony supplier on implementation and troubleshooting.
- Network management and optimization. Assisted in ensuring LAN/WLAN connectivity, network performance monitoring, troubleshooting connectivity issues, and assisting in infrastructure upgrades ensuring stable and secure communication across systems.
- Network upgrade projects. Participated in a 3-person project team, alongside the IT Manager and an outsourced consultant, to upgrade the core network switch from a Cisco 2960 to a Cisco 1300 series switch. Configured a MikroTik router to establish a fibre-linked point-to-point connection between our company and the DR site, later extending it into a full routing setup with DHCP and internet access for the remote site.
- Microsoft 365 administration. Handled software installation, user account management and user specific email configurations.
- Firewall and antivirus management. Installed a dedicated antivirus software to monitor risks from the staff pcs and also filter malicious sites and prevent unauthorized downloads for security, security updates and assisted in managing firewall configurations and policies, including implementing unidirectional connectivity between my company and the DR site for the backup link, load balancing across internet links, and setting up a VPN tunnel for secure remote access to company data for staff working outside company premises.
- IT asset management. Coordinated with the accounts department and our suppliers for equipment requisitions and inventory control for optimal resource allocation.
- Windows software installation and maintenance. Installed, configured, and maintained Windows operating systems across multiple organization devices thus ensuring seamless IT operations.

Internship | August 2023 – May 2024
Laikipia County Revenue Board, Nanyuki

Key Contributions:

- Troubleshooting and Diagnostics. Executed network troubleshooting, hardware and software troubleshooting, system troubleshooting, resolving technical malfunctions, optimizing IT performance, and minimizing disruptions to ensure seamless operations.
- System Testing. Supported testing and evaluation of a new revenue collection system during its implementation, identifying functional issues ahead of deployment to help ensure a stable, reliable rollout of the system.
- Technical Support & Issue Resolution. Delivered hands-on technical support to staff, diagnosing and resolving IT issues promptly to minimize disruption to daily operations.
- Software Maintenance & Security Updates. Implemented and maintained software updates, security patches, and system upgrades, of the staff machines and the department server thus strengthening data integrity and improving operational reliability.
- IT Training & Knowledge Development. Designed and delivered IT training sessions, equipping staff with essential digital skills, improving efficiency in the use of any new IT equipment and software, and reducing repetitive support requests.

EDUCATION

Bachelor of Science in Computer Science | September 2019 – April 2023
Chuka University | Second Class Honours (Upper Division)
