IT ASSISTANT

Microsoft 365 | Windows Server | Active Directory | Network Infrastructure | End-User Support | Backup & Disaster Recovery | VPN | Endpoint Security | IT Asset Management

PROFESSIONAL SUMMARY

IT Assistant with experience in enterprise IT infrastructure, end-user support, and systems administration. I have worked with Microsoft 365, Windows Server, Active Directory, network infrastructure, and backup and disaster recovery. I provide technical support to over 40 end users, support the administration of enterprise systems and contribute to infrastructure projects that keep the business operations running smoothly. I enjoy troubleshooting technical challenges, improving user experience, and continuously expanding my knowledge of enterprise infrastructure and cybersecurity.

TECHNICAL SKILLS

Systems: Microsoft 365, Windows Server, Active Directory, Windows 10/11, macOS.

Networking: LAN/WLAN, VPN, Cisco switching, MikroTik, Fortinet firewall.

Backup and security: Veeam Backup & Replication, Synology, Symantec Endpoint Protection.

Other: Yeastar PBX and IP phones, user support, IT asset management

PROFESSIONAL EXPERIENCE

IT Assistant

June 2024 - Present

English Press Limited, Nairobi.

I give end-user support and assist the IT Manager in looking after the company's IT systems and network.

- Give technical support to 40+ users, fixing hardware, software, Windows and network problems to keep downtime low.
- Set up desktops and printers, including Windows installation, domain joining, Microsoft 365 setup, drivers and business applications installation.
- Support 30+ Microsoft 365 accounts: new users, licenses, mailboxes and access.
- Support 40+ Active Directory accounts: onboarding, password resets, permissions and group memberships.
- Assist with Windows Server administration, backups and disaster recovery using Veeam Backup & Replication.
- **Disaster recovery project:** when backups to the DR site began failing, I assisted the IT Manager in replacing the router there. I helped configure the new router and travelled to the DR site to test connectivity. I then took part in recovery testing with the IT Manager: together we restored a test file deleted after backup and a full virtual machine to a new location and checked it against the live one. The backups have run reliably since.
- **Wireless project:** as tasked by the IT Manager, I set up wireless internet access for an unserved area. I configured the MikroTik router and its firewall rules to block wireless users from internal systems, limited router management to two authorised computers, and tested the setup from a laptop and a phone.
- Took part in a Cisco core switch upgrade with the IT Manager. The vendor configured the new switch and I helped move the cabling over. It worked from the first day with no complaints.
- Supported the move from Cisco IP phones to a Yeastar phone system and dedicated PBX, working with an outsourced telephony provider. I installed 35 IP phones, tested calls and trained users, and worked alongside the IT Manager on fixing outbound and international calling after launch.
- Assist in looking after the LAN and Wi-Fi, firewall settings, antivirus and VPN access to keep systems secure.
- Support IT asset buying, inventory and vendor contact.

ICT Intern

August 2023 - May 2024

Laikipia County Revenue Board, Nanyuki.

Supported the ICT department with technical support, system upkeep and the roll-out of the county revenue management system.

- Gave technical support to 15+ staff, fixing hardware, software and network problems.
- Took part in testing the revenue management system before it went live, helping to find issues.
- Installed software updates, security patches and system upgrades on staff workstations and department servers.
- Assisted in training users on the system, which helped staff adopt it and reduced repeat support requests.
- Did regular maintenance and troubleshooting of computer hardware, software and the network.

EDUCATION

Bachelor of Science in Computer Science Chuka University Second Class Honours (Upper Division)	September 2019 - April 2023
Kenya Certificate of Secondary Education (KCSE) Othaya Boys High School Mean Grade: B+	February 2015 - November 2018
